Subject: Future Development Strategy & Tauranga Urban Strategy - Submission period open 5 October - 5 November 2018

Councils in high growth areas like the western Bay of Plenty are required by Government to assess future housing and business needs and create a development strategy for the next 30 years.

The Future Development Strategy (FDS), including the **Tauranga Urban Strategy**, is a document produced by SmartGrowth (a partnership of councils, tangata whenua, community groups and some government departments) to drive the discussion and decision-making needed to manage this expected growth. It identifies the big issues – things like housing, transport, employment, an aging demographic, cultural wellbeing, the environment – that we must collectively consider as our population increases over the next 30 years. Where and how will we house an extra 66,000 people in 43,000 more homes? What kind of transport systems and infrastructure do we need? What options are on the table right now? How will we pay for it all? This document sets goals but also aims to spark discussion and debate, feedback and great ideas and will be reviewed every three years.
